CO1–CO6 demonstrations
CO1 — OS as a Service Layer
Example program: system_calls.c
Operating system concepts demonstrated through airport scenarios.
CO2 — Process Management
Example program: process_management.c
Operating system concepts demonstrated through airport scenarios.
CO3 — Inter-Process Communication
Example program: pipe_demo.c / signal_demo.c / socket_demo.c
Operating system concepts demonstrated through airport scenarios.
CO4 — Memory Management
Example program: memory_management.c
Operating system concepts demonstrated through airport scenarios.
CO5 — File Systems
Example program: file_system.c
Operating system concepts demonstrated through airport scenarios.
CO6 — Concurrency
Example program: thread_demo.c / mutex_demo.c / semaphore_demo.c
Operating system concepts demonstrated through airport scenarios.
